

PROFESSIONAL SUMMARY

Senior Software Engineer and Systems Architect with 6+ years of professional engineering experience (building software since 2012). Proven track record leading engineering on software powering 3M+ active production websites, architecting distributed media streaming pipelines, and developing full-stack clinical healthcare platforms. Core technical expertise across TypeScript, React, Next.js, Node.js microservices, PostgreSQL, and Linux infrastructure.

TECHNICAL COMPETENCIES

Languages & Runtimes: TypeScript, JavaScript (ESNext, Node.js), Python, PHP, Shell/Bash, SQL	Frontend & Web Platform: React (18/19), Next.js (15/16 App Router, Server Components), Turborepo, Tailwind CSS
Mobile & Cross-Platform: React Native, Expo, React Native Paper, React Navigation, Native Android Bridges	Type-Safe Contracts: tRPC (end-to-end type safety), TanStack Query, TanStack Table & Virtual
Backend Architecture: Node.js (Fastify, Express), Hexagonal Architecture, Transactional Outbox Pattern	Distributed Systems: Concurrency Leases, Distributed Worker Sharding, Multi-Tenant Control Planes
Databases & Persistence: PostgreSQL, Prisma ORM, Drizzle ORM, Redis (caching, leases), Checksum Migrations, SQLite	Linux & DevOps: Arch Linux, systemd daemons, PipeWire, Docker, GitHub Actions CI/CD, Google Cloud Platform
Testing & Quality: Jest, React Testing Library, PHPUnit, Playwright, BackstopJS Visual Regression Testing	Spoken Languages: English (Professional working proficiency), Bengali (Native)

PROFESSIONAL EXPERIENCE

Purrfect Software Limited

Remote / Dhaka, Bangladesh | Jan 2024 – Present

Co-Founder & Head of Engineering

- Jasper Media Platform (sakibtamim/Jasper):** Architected a resilient distributed audio streaming pipeline utilizing an externalized yt-dlp and FFmpeg daemon, eliminating stream dropouts and 403 throttling errors; implemented automated worker failover and concurrency lease coordination across voice channels.
- Hosted Jasper SaaS Control Plane:** Designed a logically multi-tenant SaaS control plane allowing community Discord servers to self-onboard with zero DevOps configuration. Engineered per-guild concurrency leases, distributed worker sharding, gateway intent isolation, and graceful worker drain contracts for zero-interruption deployments.
- Web Client & Plugin Ecosystem:** Built interactive Next.js web player (apps/web) with synchronized seek bars and track scrubbing, backed by a typed Plugin SDK and checksum-tracked PostgreSQL migrations.
- Pawthy Secrets CLI (@ps1-oss/pawthy):** Authored and open-sourced zero-trust developer secret synchronization CLI adopted across team repositories. Built with hexagonal architecture, transactional outbox pattern, Fastify REST APIs, and Discord interactive approval webhooks.
- Client Architecture Oversight:** Provided technical leadership and architectural reviews for high-concurrency client download accelerators and commercial retail platforms.

Motion Mechanics Physiotherapy & Rehabilitation Hub

Savar, Dhaka, Bangladesh | Jan 2024 – Present

Co-Founder (Operations & Technology)

- Clinic Launch & Physical Operations:** Co-founded an outpatient physical rehabilitation clinic on CRP Road in Savar. Managed commercial lease negotiations, clinical space buildout, specialized medical hardware procurement (traction units, electrotherapy, treatment plinths), and clinical team staffing across Neurology, MSK, and Paediatrics.
- mm-website Clinical Platform:** Architected and implemented full-stack clinical operations and patient scheduling platform using Next.js 15, Turborepo, tRPC, Prisma ORM, PostgreSQL, TanStack Query, and Tailwind CSS.
- Cloud Infrastructure:** Engineered custom Google Cloud Platform service account re-authentication wrappers and automated secrets deployment.

Client Projects & Linux Systems

Remote / Savar, Dhaka | Jan 2024 – Present

Lead Frontend Engineer & Systems Architect

- Sunshine Physio Platform (purrfectsoft/sunshine-physio-webapp):** Lead Frontend Engineer on active client engagement. Architecting clinical triage workflows and appointment scheduling across Next.js 16 web and React Native / Expo mobile with bilingual localization (English/Bengali).
- Knot Mesh Linux Workspace (kuasha420/knot-mesh):** Distributed multi-node Linux/Wayland workspace mesh connecting Arch Linux desktop, laptop, and Steam Deck via KRDp virtual display streaming, remote PTY execution, and automated batching.
- Qualcomm 4G LTE Linux Modem Daemon (mis1ty):** Reverse-engineered Linux desktop daemon for Qualcomm MDM9600 modems with PipeWire 8kHz narrowband cellular voice bridge native to baseband hardware.

Senior JavaScript Engineer (React / Full-Stack) — Google Site Kit Lead

- **Core Google Partnership:** Partnered directly with Google engineering leadership on **Site Kit by Google** ([google/site-kit-wp](https://google.com/site-kit-wp)), Google's official WordPress plugin active on **3,000,000+ production websites**.
- **Pull Request Authoring:** Authored **236 merged pull requests** in Google's upstream repository across Google Analytics 4 (GA4), Reader Revenue Manager, AdSense, and Search Console.
- **Site Kit: User Input v2 Design Document:** Authored technical design document approved by Felix Arntz (Tech Lead, Google), Mariya Moeva (Lead PM, Google), and Evan Mattson (Associate Director of Engineering, 10up). Engineered local state persistence, asynchronous datastore syncing, inline editing, and Key Metrics dashboard integration.
- **Site Kit: Ad Blocking Recovery (ABR) Design Document:** Authored technical design document approved by Google PM and 10up engineering leadership. Specified and implemented AdSense ABR tags, automated snippet injection, publisher messaging, and BackstopJS Visual Regression Testing.
- **Existing Tags Simplification (ETS) Epic:** Unified tag detection and validation across GA4, Tag Manager, and AdSense using decoupled store factories (`createExistingTagStore`).
- **Process Innovation & Recognition:** Created team-wide "Mid-Point Review" process officially adopted across 10up's Site Kit workflow to minimize PR churn. Awarded the **10up Summit "Uppie" Award** (Reykjavik, Iceland, May 2023) for engineering excellence. Appointed technical orientation buddy for incoming software engineers.

Star IT Limited & Aladdin Studios

Dhaka, Bangladesh | Feb 2020 – Aug 2021

JavaScript Engineer (React Native & Node.js) / Founder (Aladdin Studios)

- **Priyojon Care Telemedicine Suite:** Engineered complete telemedicine platform connecting patients with verified medical doctors for real-time video consultations, electronic prescription delivery, and home healthcare provider dispatch across React Native mobile apps and Node.js REST APIs.
- **Farazi HomeCare:** Built medical homecare mobile client for on-demand nursing and physiotherapy dispatch.
- **Bismillah Matrimonial:** Developed cross-platform mobile matchmaking application with biometric authentication and candidate search.
- **Enterprise Management Platforms:** Developed frontend and API services for `starnet` (ISP management), `irent` (property accounting), and `iBOSCRM`.
- **IboTuber Media Suite:** Video distribution platform with adaptive bitrate streaming.

Savar Digital Polytechnic Institute

Savar, Dhaka, Bangladesh | Apr 2018 – Feb 2020

Junior Instructor, Department of Computer Technology

- Instructed polytechnic diploma students in C/C++, JavaScript, PHP, relational database design, and computer networking.
- Supervised hands-on laboratory sessions covering operating system administration, network routing protocols, and microcomputer hardware diagnostics.

Early Software Development & Freelance

Savar, Dhaka, Bangladesh | 2012 – 2017

Software Developer & Linux Systems Administrator

- Developed custom open-source WordPress plugins (`country-state-dropdown-plugin` in 2014) published to WordPress Plugin Repository.
- Engineered raw PHP B2B licensing platforms (`namm-b2b-license-delivery`) with cryptographic key generation and validation.
- Built early hybrid mobile applications using Apache Cordova, PhoneGap, and Crosswalk Project (TUFLA, PageDab). Managed bare-metal Linux servers and LAMP/LEMP stacks.

PUBLISHED OPEN-SOURCE LIBRARIES (~7.5K MONTHLY NPM DOWNLOADS)

Library / Package	Registry	Monthly Usage	Technical Description
react-native-paper-phone-number-input	npm package	~4,100 / mo	International phone number input with search modal and flag picker for React Native Paper.
react-native-paper-toast	npm package	~2,140 / mo	Imperative toast notifications component, provider, and custom hook for React Native Paper.
react-native-immersive-bars	npm package	~570 / mo	Android navigation bar transparency component for immersive edge-to-edge layouts.
react-native-paper-alerts	npm package	~520 / mo	Cross-platform imperative alert and confirm modal dialogs for React Native (iOS, Android, Web).
mst-persistent-store	npm package	~240 / mo	Persistent MobX-State-Tree store provider and custom consumer hooks for React and React Native.
react-native-template-ts-plus	GitHub / npm	Starter	Opinionated TypeScript starter template for React Native with navigation, state, and UI pre-wired.
antigravity-manager-bin	Arch Linux AUR	AUR package	AUR package maintainer for Antigravity desktop tools.
jimha	GitHub (Python)	Linux evdev	Linux evdev input interceptor for child hardware isolation.

EDUCATION & PROFESSIONAL TECHNICAL TRAINING

Diploma in Computer Technology (4-Year Engineering Diploma)

Accredited technical diploma covering computer hardware architecture, electronics, operating systems, networking, and foundational software engineering.

Savar Digital Polytechnic Institute | Conferred 2017

B.Sc. in Computer Science & Engineering (for Diploma Holders)

Completed core CS coursework (Data Structures, Algorithms, Advanced Programming). Paused studies to prioritize full-time software engineering and family commitments.

European University of Bangladesh | 6 of 10 Semesters Completed

Professional Systems & Network Training (RHCE & CCNA Curriculum)

Intensive training covering Red Hat Enterprise Linux system administration, storage, security policies, and Cisco routing & switching architecture.

IT Bangla Limited | 2017 – 2018

HONORS & INTERESTS

Honors: Recipient of the **10up Summit "Uppie" Award** (Reykjavik, Iceland, May 2023) for engineering excellence on Google Site Kit.

Interests: Linux systems, tactile hardware interfaces, agricultural automation.
