

PROFESSIONAL SUMMARY

Entrepreneurial, high-agency Founding Engineer and Technical Leader with a 10-year track record of turning ambitious visions into resilient, revenue-generating reality across digital products and physical operations. Proven ability to operate with zero boundaries: co-founded a modern outpatient physical rehabilitation clinic (managing physical space launch, medical equipment procurement, and clinician staffing while architecting its complete paperless software suite), engineered enterprise audio streaming architectures with 695 production commits (**Jasper**), and authored canonical design documents approved by Google Staff Tech Leads on **Google Site Kit** (236 merged PRs). Deep hands-on mastery of TypeScript, Next.js 15, React Native, Node.js microservices, PostgreSQL, and Linux infrastructure. The ideal technical anchor for early-stage and high-growth companies requiring an autonomous builder who delivers from day one.

CORE TECHNICAL & LEADERSHIP CAPABILITIES

- 0-to-1 Product & Startup Execution:** Greenfield architecture, rapid prototyping, business model translation, hiring & mentorship

Distributed Systems & Real-Time Media: Concurrency leases, sharding, transactional outbox, WebSocket pipelines (yt-dlp, FFmpeg)

Developer Experience & Tooling: Author of Pawthy CLI (zero-trust secrets sync), automated release pipelines, custom monorepo scaffolds
- Full-Stack & Mobile Mastery:** Next.js 15 (App Router, Server Components), React, React Native, Expo, Turborepo, tRPC, Fastify

Database & Infrastructure: PostgreSQL, MySQL, Prisma ORM, Redis, Docker, GitHub Actions, GCP, Bare-Metal Linux (RHCE)

Physical Operations & Leadership: Commercial lease negotiations, clinical team management, unit economics, cash reconciliation

LEADERSHIP & TECHNICAL EXPERIENCE

- Purrfect Software Limited / Purrfect Universe — Lead Systems Architect & Founder** London, UK & Dhaka (Remote) | 2024 – Present

 - Jasper Platform Architecture (sakibtamim/Jasper):** Spearheaded architecture and hands-on implementation for **93.4% of the codebase (695 commits)** of a distributed, fault-tolerant Discord audio streaming platform. Eliminated persistent audio stream drops and 403 Forbidden errors by creating an externalized streaming engine with yt-dlp and FFmpeg. Architected distributed sharding, runtime identity, and graceful drain contracts (HJ-OSS-11), alongside per-guild AFR leases and multi-guild concurrency (HJ-OSS-04). Built an interactive Next.js web application (apps/web) with real-time audio scrubbing and cross-client synchronization. Formulated a versioned Plugin SDK for typed capability isolation (HJ-OSS-10, HJ-OSS-12) and checksum-tracked PostgreSQL migrations (HJ-OSS-07).
 - Pawthy Secrets CLI & Purrmission (kuasha420/purrmission):** Built and open-sourced **Pawthy (@psl-oss/pawthy)**, a zero-trust developer secret synchronization CLI adopted across every repository at PSL and Motion Mechanics (462 commits). Implemented hexagonal architecture with DomainPorts, transactional outbox pattern, Fastify APIs, and Discord approval gates.
 - Knot Mesh (kuasha420/knot-mesh):** Engineered a multi-node distributed workspace mesh connecting Arch Linux / KDE Plasma 6 Wayland desktop, laptop, and Steam Deck via KRDP Wayland virtual monitors, remote PTY execution, and Linda TupleSpace batching (178 commits).
- Motion Mechanics — Co-Founder & Head of Technology / Operations** Savar, Dhaka | 2024 – 2026

 - Clinic Launch & Physical Operations:** Co-founded and launched **Motion Mechanics: Healing Reimagined**—a modern physical rehabilitation clinic on CRP Road in Savar. Directed commercial lease negotiations, clinical facility launch, specialized treatment equipment procurement, and clinical staffing across Neurology, Musculoskeletal (MSK), and Paediatrics.
 - `mm-website` Clinical Platform (614 commits / 52.4% author):** Built a high-performance clinical platform using Next.js 15, Turborepo, tRPC, Prisma ORM, PostgreSQL, TanStack Query, and Tailwind CSS. Built custom Google Cloud Platform re-auth wrappers and automated secrets deployment.
 - `sunshine-physio-universalapp` (138 commits / 59.7% author):** Engineered a universal clinical care and triage platform featuring high-concurrency appointment scheduling, pain triage workflows, and bilingual ICU localization (English/Bengali) across Next.js and React Native / Expo.

10up, Inc. / LLC — Senior JavaScript Engineer: React (Google Site Kit)

Remote (Roseville, CA & New York, NY) | August 2021 – September 2024

- **Google Technical Partnership:** Dedicated technical lead partnering directly with Google on **Site Kit by Google** (google/site-kit-wp), Google's official WordPress plugin active on **millions of production websites worldwide**.
- **Massive Engineering Output:** Authored and merged **236 production pull requests** directly into Google's repository across Google Analytics 4 (GA4), Reader Revenue Manager (RRM), AdSense, and Search Console.
- **Canonical Design Documents (Authored by Arafat Zahan):** Authored the **User Input v2** design doc (approved by Felix Arntz, Google Tech Lead, and Mariya Moeva, Google Lead PM) delivering local state persistence, inline question editing, and personalized Key Metrics dashboard integration; and the **Ad Blocking Recovery (ABR)** design doc (approved by Google PM & 10up Leadership) delivering end-to-end AdSense recovery tag placement and error-protection script injection.
- **Architecture & Process Innovation:** Unified tag detection across GA4, Tag Manager, and AdSense via reusable store factories (createExistingTagStore). Created the team-wide **"Mid-Point Review"** process officially adopted across 10up's Site Kit workflow; awarded the **10up Summit "Uppie" Award** (Reykjavik, Iceland, 2023) for engineering excellence.

Star IT Limited / Aladdin Studios — JavaScript Engineer / Founder

Dhaka, Bangladesh | February 2020 – August 2021

- **Engineering Leadership:** Directed and engineered **28 production repositories** across telemedicine, e-commerce, and enterprise ERP/CRM.
- **Priyojon Care Telemedicine Suite:** Architected and built priyojon-app, priyojon-serviceapp, and priyojon-firebase, providing live doctor-patient consultations, electronic health records, and emergency dispatch.
- **Open-Source Inbound Recruitment:** Authored popular open-source packages (react-native-paper-toast, react-native-paper-alerts, barikoi-unified) which led directly to inbound recruitment by 10up's Head of Engineering.

NOTABLE OPEN-SOURCE & CRAFTSMANSHIP

react-native-paper-phone-number-input Standard international phone number input component for React Native Paper with country search and validation. ~4,100 dl/mo	react-native-paper-toast Lightweight, imperative toast notifications component fully integrated with Material Design / React Native Paper. ~2,140 dl/mo
react-native-paper-alerts Cross-platform imperative alert and confirm modal dialogs built for React Native Paper ecosystems. ~520 dl/mo	jimha (Toddler Tactile OS Shield) KDE/Linux application intercepting raw hardware input events to create sensory audio-visual feedback while protecting host OS. Linux evdev / Python

EDUCATION & CERTIFICATIONS

Savar Digital Polytechnic Institute — Diploma in Computer Technology (4-Year Engineering Diploma)	Conferred 2017
European University of Bangladesh — B.Sc. in Computer Science & Engineering (6 of 10 Semesters Completed; Dropped out to prioritize high-velocity production delivery and family education)	Completed 60%
Certifications: Red Hat Certified Engineer (RHCE, 2018) • Cisco Certified Network Associate (CCNA, 2017)
